

"When considering another vendor, we were talking about a two- to four-week implementation process. With the Quest product, the live migration of 1,100 mailboxes was completed within four hours. We were expecting the archived mail to take about a week to complete and it only took about 18 hours. We actually migrated more than one million mail objects with only a .01% data corruption. To have everything done within a 48-hour period was just amazing."

— Mike Moses
Systems Engineer
Fauquier Hospital

- Preserves crucial data for users, such as personal address books, data stored in GroupWise archives (analogous to pst files) and meeting attendee status
- Moves data from GroupWise servers to Exchange servers so that all messages can be replied to after migration
- Moves data from GroupWise servers to Exchange servers so that all meetings can be efficiently rescheduled
- Permits migration of users in batches transparently to other internal and external users to permit training on the new client
- Gives administrators control of the process permitting scheduling and minimizes timetable slippage

Quest® GroupWise Migrator for Exchange

Comprehensive Enterprise Migration from GroupWise to Exchange with True Coexistence

Quest® GroupWise Migrator for Exchange provides a secure and reliable migration from GroupWise to Exchange. It converts users' mail, calendars, tasks, personal address books and frequent contacts, and stores them on users' new mailboxes on the Exchange server, ensuring preservation of important enterprise information. It also migrates GroupWise Archives into Microsoft Outlook personal stores.

Uninterrupted User Messaging and Collaboration

Users continue to exchange messages and schedule meetings, regardless of whether their mailbox has been migrated. The migration is transparent to external users such as customers and partners.

Reduced Help Desk Calls

Data can be migrated without end-user involvement, ensuring a secure, timely and reliable migration. In doing so, the help desk will avoid additional call volume as a result of end users not being able to perform required migration tasks.

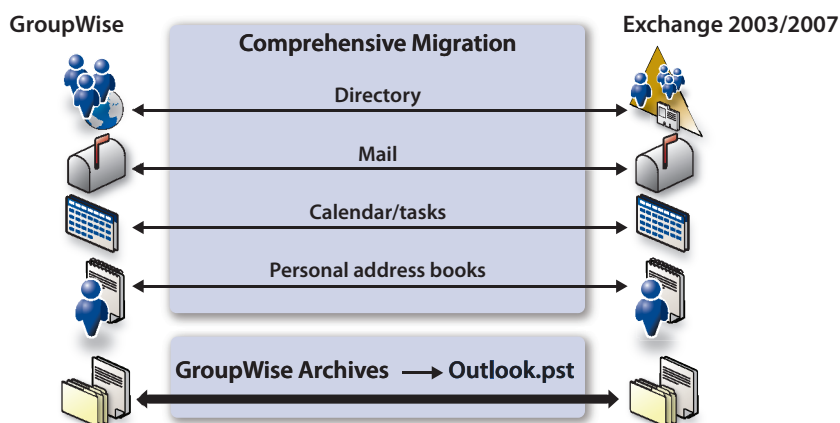

Simplified Administration

GroupWise Migrator automates the creation of Exchange mailboxes, quota setting and appropriate mail routing. It also automates gaining access to GroupWise mailboxes for migration. This saves time, prevents errors and streamlines administrative procedures.

Parallel Migrations

To achieve high performance, GroupWise Migrator can migrate multiple users' data simultaneously. To accelerate large-scale migrations, GroupWise Migrator can be run on multiple migration servers running in parallel.

Maintain message integrity: GroupWise Migrator preserves valuable information, including dates, times,

System Requirements

Operating Systems

- Novell GroupWise 5.5.3 to 7.0
- An account must be defined with administration rights to the GroupWise server

Target Exchange server

- Exchange 2003 or 2007
- An account must be defined with required access to Exchange and Active Directory

Migration machine

- Windows XP SP 2 or Windows 2003 Server SP1
- Write/execute permissions
- Novell Netware Administrator program (NWAdmin or ConsoleOne)
- Novell Client for Netware
- Novell GroupWise Client
- Outlook 2002 or 2003 must be installed
- Note: GroupWise 5.5 is not compatible with Outlook 2003

Required for any Exchange Administrative Functions

- Windows Administration Tools (adminpak.msi)
- Exchange SystemAdministration Tools
- Microsoft PowerShell (for Exchange 2007)

HTML formatting, senders, recipients and attachments, and allows users to reply to migrated messages without making address edits.

Converts personal address books, frequent contacts and distribution lists into contacts on the

Exchange Server: GroupWise Migrator eliminates the need for cumbersome export/import and data entry procedures by preserving key address book information, such as phone and fax numbers, mailing addresses, nicknames and distribution lists.

Archive conversion: Valuable archived mail, calendar and task data is migrated from GroupWise Archives to Outlook personal stores.

Automatically determines appropriate Internet addresses: GroupWise Migrator automatically creates a table of user names, native GroupWise addresses and preferred Internet addresses that administrators can review and edit using Microsoft Excel or Access. In addition, Exchange is configured to accept all alternative Internet Addresses that GroupWise honored.

Intelligent advisor and resolution tools: GroupWise Migrator includes an intelligent advisor that prevents common configuration issues and displays issue-specific information with resolution techniques if errors are encountered during migration.

About Quest Software, Inc.

Quest Software, Inc. delivers innovative products that help organizations get more performance and productivity from their applications, databases and Windows infrastructure. Through a deep expertise in IT operations and a continued focus on what works best, Quest helps more than 18,000 customers worldwide meet higher expectations for enterprise IT. Quest Software can be found in offices around the globe and at www.quest.com.
