

Toad™ for MySQL®

Faster MySQL® database development and administration

Rapidly create and execute queries, automate database object management and simplify SQL-code development with Toad™ for MySQL®. This powerful, yet easy-to-use, productivity solution for MySQL professionals simplifies and accelerates database development and administration. With access to an intelligent community of users and experts, resolving performance issues is quick and easy. Regardless of your skill or experience level, Toad for MySQL will empower you to meet growing demands from customers and end users with increased speed and accuracy.

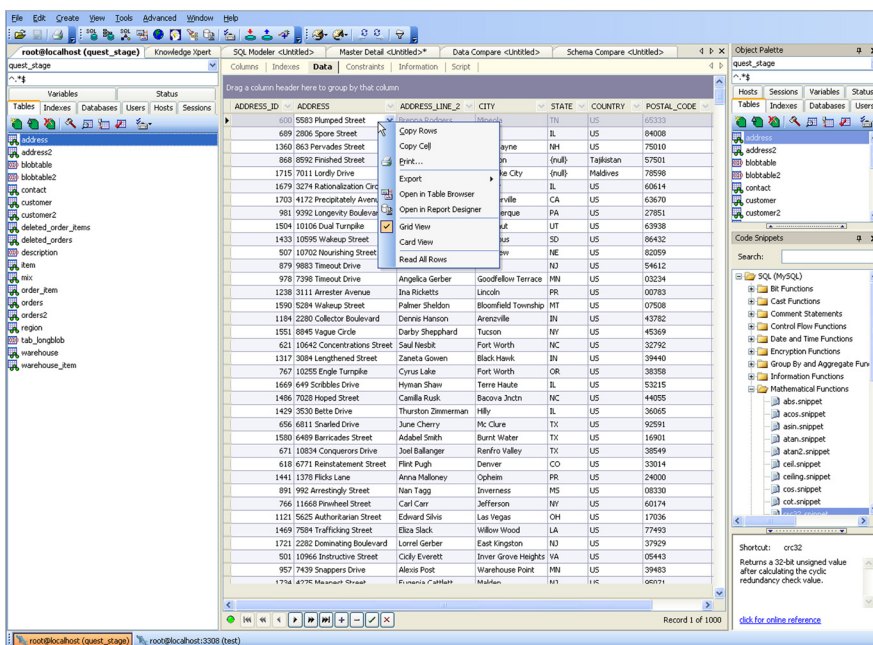

A powerful SQL editor

Effortlessly edit SQL with these advanced features:

- **Macro record/playback** — Record a series of keyboard commands in the editor and play them back multiple times, reducing manual effort.
- **Find and replace** — Save time by performing a find-and-replace across multiple files found in a directory structure.
- **Configurable code formatting** — Modify the layout of SQL code in the editor.
- **Code snippets** — Use drag-and-drop functionality for frequently used SQL functions.
- **Shortcut keys** — Perform frequently used actions faster than ever before.
- **Auto completion** — Complete databases, tables and columns automatically when entered.

Benefits:

- Create, modify, execute and save queries.
- Format code layout — insert headers, add or remove extra lines and change the case for keywords — quickly and easily.
- Save extracted data from the database to different formats.
- View, create, modify and manage database objects in record time.
- Access MySQL expertise instantly.

Speed through your development or administration tasks with Toad's intuitive user interface.

Client requirements

Intel® Pentium® PC – 1 GHz
Minimum

1 GB RAM and 1.33 GB disk space

Windows® Server 2003, 2008,
and 2008 R2 64-Bit, Windows®
XP Professional, Windows®
Vista®, Windows 7 and 8 (32-Bit
or 64-Bit)

Server requirements

MySQL 4.1, 5.0, 5.6

Microsoft® .Net® Framework

.NET 4.5: Windows Vista SP2,
Windows 7 and 8, Windows
Server 2008 SP2, 2008 R2,
and 2012

.NET 4.0: Windows XP, Windows
Vista (SP1 or earlier), Windows
Server 2003, and 2008 (SP1
or earlier)

Virtualization support

Citrix® support on Windows
Server 2003 Enterprise Server
(Service Pack 2) using the Citrix
MetaFrame® Presentation Server
5.0 and Citrix Presentation®
Server Clients 10.2.

Data grids

View the output of data in ways that are easy to understand, configure and export to different file formats. View data output in a grid or card format for summary information at a glance. Configure output by sorting, grouping, filtering and moving columns without re-executing the query. Either entire data queried or selected data in a grid can be outputted to multiple formats, including: Microsoft® Excel®, fixed column width, delimited text, XML schema, XML data, HTML table or insert statements.

Database browser

View database objects across multiple databases or servers. Objects such as tables, indexes, views, users, hosts, sessions, procedures and functions can be quickly viewed and managed through drilldown options. The database browser simplifies sifting through hierarchical mountains to find the correct data. With a single click, it further facilitates the comparison of objects of the same type.

About Dell Software

Dell Software helps customers unlock greater potential through the power of technology—delivering scalable, affordable and simple-to-use solutions that simplify IT and mitigate risk. This software, when combined with Dell hardware and services, drives unmatched efficiency and productivity to accelerate business results. www.dellsoftware.com.
